## 4. FIRST AID MEASURES

### **Description of first-aid measures**

#### **General Advice**

- First Aid responders should pay attention to self-protection and use the recommended protective clothing. If potential for exposure exists refer to Section 8 for specific personal protective equipment.
- Show this material safety data sheet to the doctor in attendance.

#### In case of inhalation

Move affected individual to fresh air and keep comfortable for breathing. If not breathing, give artificial
respiration; if by mouth-to-mouth use rescuer protection (pocket mask, etc.). If breathing is difficult,
oxygen should be administered by qualified personnel. Call a physician if necessary.

#### In case of skin contact

• In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes.

#### In case of eye contact

- Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
- Seek medical advice

#### In case of ingestion

• If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

#### Most important symptoms and effects, both acute and delayed

## LIQUID COLOR SAFE BLEACH

- Aside from the information found under Description of first aid measures (above) and Indication of immediate medical attention and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicology Information.
- Skin contact may aggravate an existing skin disease.

#### Notes to physician

- All treatments should be based on observed signs and symptoms of distress in the patient.
- Treat symptomatically.
- There is no antidote.
- Consult with an ophthalmologist immediately in all cases.
